

## Name

Enroute is a mobile application which is designed for businesses who offer food delivery.

## Description

The app will help the driver in finding the shortest and quickest route around town while keeping him in track and giving his live location to the business manager. Along with that, Enroute will make the delivery guy's job easier while, keeping the customer happy and the business running more efficiently than ever. It also allows for customizable messages to be sent by the driver and customizable ETA for the customer to request.
